Sapisin®

The global solution for floors,
ceilings and interior walls

SIMONIN
Wood Solutions

Complete

A three in one component constituting 2 outer boards sandwiching an inner plate of water resilient high density particle board.

Sapisin® is delivered in standard lengths of 3.90 meters by 160 mm.

For use in • finished floors / ceilings
• finished interior walls

Sapisin® with one oak face

Grooves for electric cables

All around savings

More economic than traditional rudimentary components Sapisin® allows you :

- a 2 in 1: floor and ceiling installation
- a high quality finished ceiling
- to diminish heavy framework and joisting
- to lessen acoustic aggravation by 34 decibels

Refined

Available with one side in spruce, oak or ash in an array of finishes, Sapisin® provides your floor with genuine character.

Sapisin® is well suited and adaptable to classic, contemporary or modern interior design...
